

## Call for research proposals at the Mt. Fuji Weather Station in the Summer, 2008

NPO “Valid utilization of Mt. Fuji Weather Station” is now, accepting your research proposals for the summer campaign, 2008 (July – August). In the 2007 summer campaign, 9 researches of 5 fields (atmospheric chemistry, high altitude medical sciences, ecology, cosmic ray research, and communication technology) were performed during July 10 to September 5. The cost of the logistics at the research site was supported by two funds from JAMSTEC and NIES performing the researches on trans-boundary air pollution and greenhouse gas analyses.

Many uncertainties, however, exists in the plan of 2008, mainly owing to the weather conditions, discussions with JMA (The formal owner of the station) and the amount of support funds other than the upper two, etc. But, we would like to have your application form no later than February 29, 2008, by e-mail to [dokiya@edogawa-u.ac.jp](mailto:dokiya@edogawa-u.ac.jp) (the application forms for research proposal are attached) You will be requested to become the member(s) of the NPO.

Your proposals will be selected in the academic committee of the NPO, and the adopted proposal will be notified in the home page before the end of April, 2008. The exact schedule should be negotiated after then.

NPO “Valid Utilization of Mt. Fuji Weather Station”
